1. ASEM-DUO Scholarship (www.asemduo.org)

This program is for the exchange students from European countries including Poland, under the exchange agreement with Korean universities. If any student of undergraduate or graduate course comes to Korea from Europe as an exchange student, they can apply for this scholarship.

As its application period usually begins on April and May, we should finish selecting exchange students no later than early April in order to apply for this scholarship.

One pair of students from Korea and Poland could be awarded EURO 8,000, so one student could get EURO 4000 for one semester (one semester.)

Please find this website, www.asemduo.org, to know more about this program.

As this is the program for a pair of Korean and European student, there should be also our student studying at your school as an exchange student. I remember there's a short course taught in English at your school during summer semester. Is there any other course which you'd like to recommend us to have our students study at your school? The course should be more than one semester to meet the requirements of this scholarship.

2. Internship Program

If any student comes to our school as an exchange student, I guess he/she has to study Korean language for a certain period of time like one semester, since it’s not allowed to work for the first 6 month after their entry to Korea. After seeing her/his resume and ability such as English or Korean language or others, our center for career support will find an appropriate job vacancy to give her/him a chance to work in a Korean company.
